final audit day: 30/05/2023

next planned monitoring by 31/03/2026

period of validity: 01/04/2023 – 31/03/2026

Annex 1 to certificate no. 446/23

Definition of processing activities

Album is a tool for the user to browse and edit photos and videos on a mobile terminal. It's mainly used to check the photos taken or saved by the user, edit the pictures and videos, and manage the pictures and videos by category.

Following editing functions are included:

1. Intelligent adjustment, frame (poster-downloading function), sticker
2. Add the downloading function to frames, light effect, pixelation, painting

The new video editing functions:

1. AI clipping: Automatically filters video clips and uses the template theme to automatically generate a vlog
2. Theme (Download the template theme)
3. Music (online downloading)
4. Video clipping through established tracks to make video clipping efficient
5. Editing text through established tracks ensures that any time can be chosen for adding text
6. The video playing speed can be any speed within 0.1-4 times the previous speed

No Data (including IP and IMEI) and no fotos or videos ever leave the device.

Annex 2 to certificate no. 446/23

Excluded processing activities

This evaluation refers only to the above mentioned product and therefore only to the processes in which Vivo Tech GmbH and its customers are involved.

The following functions are not within the scope of the evaluation:

1. The website of vivo
2. Any functions to share photos or videos
3. Any other app installed on the phone interacting with the app
